Trends population

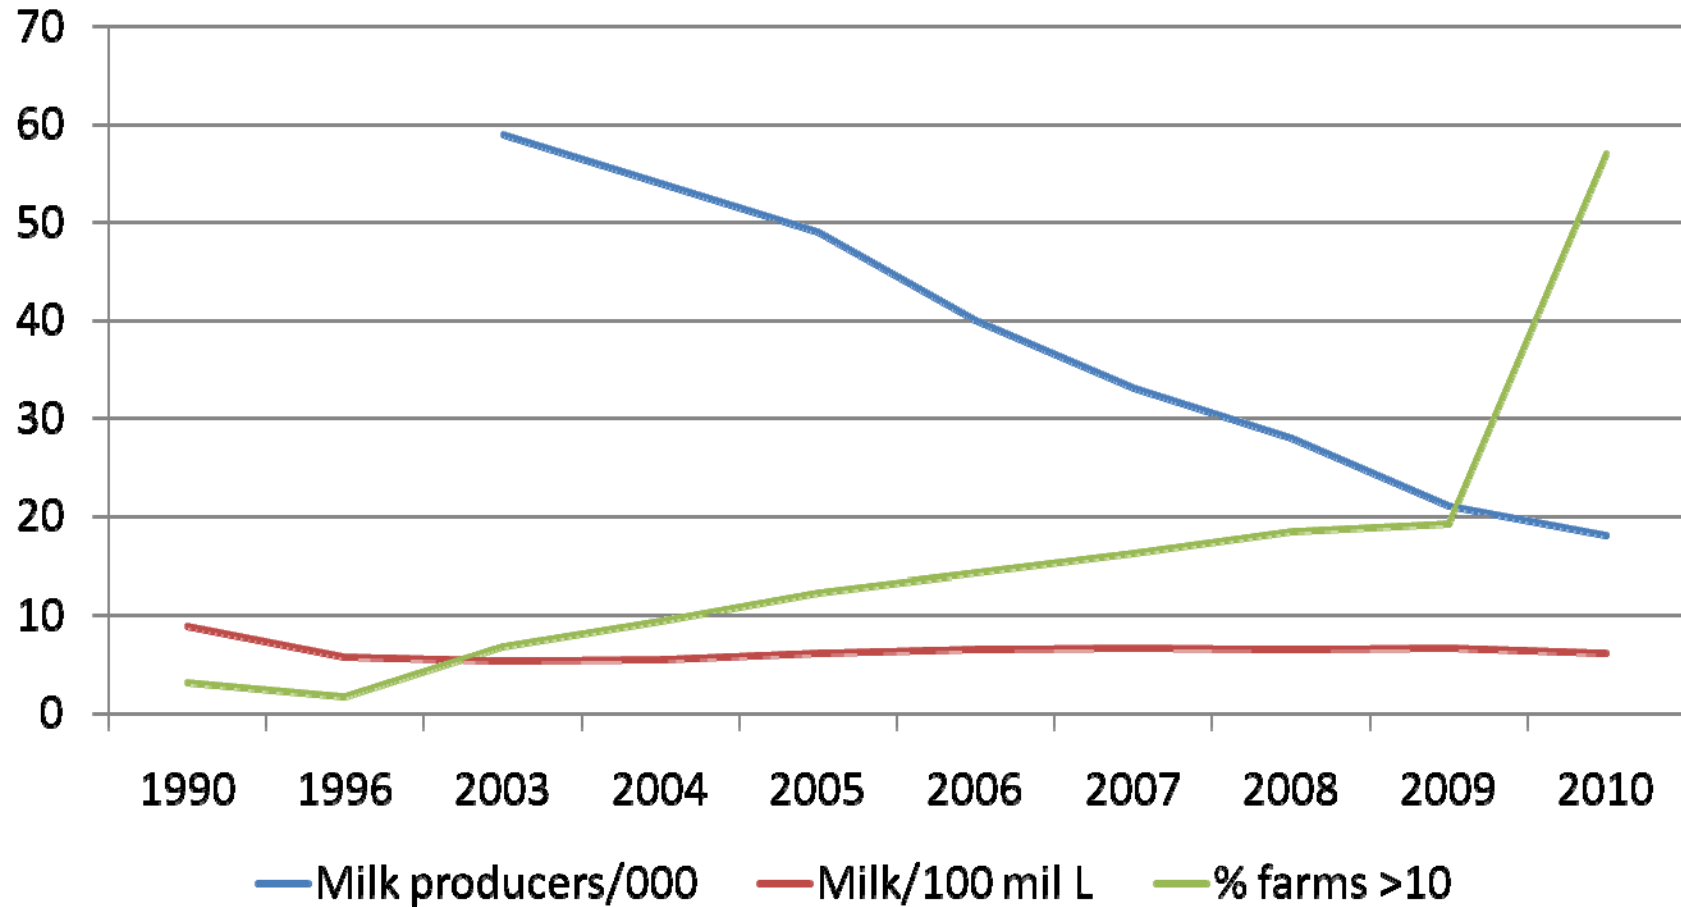

Trends livestock

Trends livestock

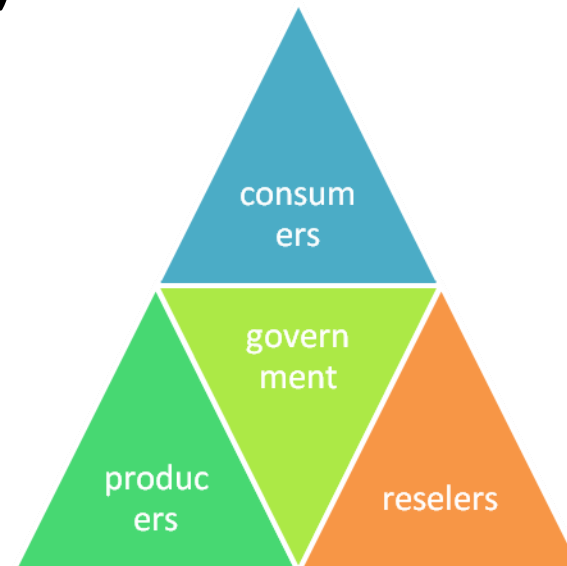

Trends livestock farming systems

ROLES AND GOALS

- huge importance of Agriculture and livestock production
 - agriculture + food products – 4th place in GDP
 - just recently 67 mil. euro in cattle production
- big potential (arable land) but ...
- government – facilitator
- strengthen producers

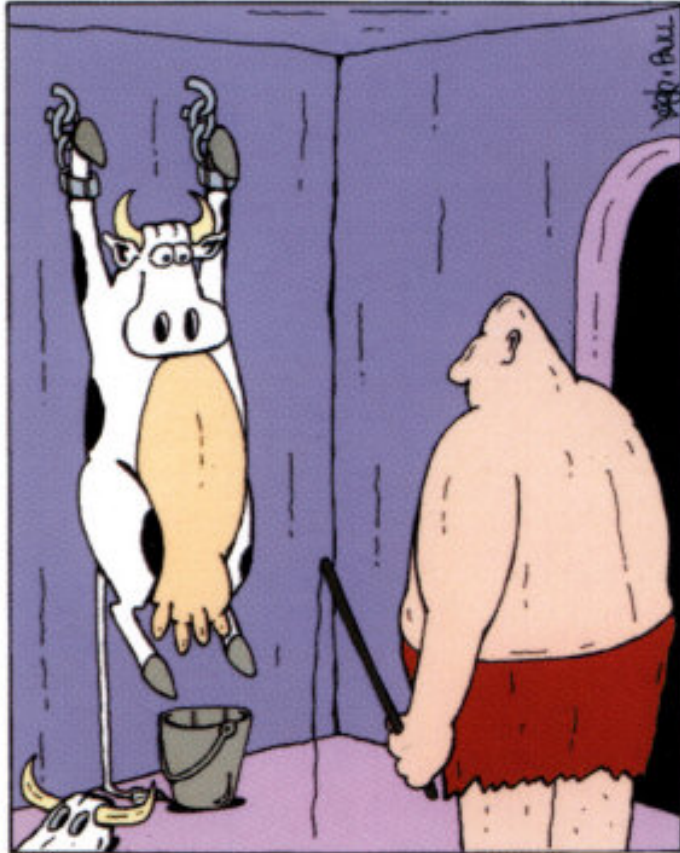

CONCLUSIONS

- War and transition - huge negative impact
 - War - more impact on animals
 - Transition – more impact on people
- Negative trends will continue
- Croatia – enough land, people?
 - Use recession – bring people back to the land
- What we need?
- New formula:

Low input – high knowledge

NEW INFO for THE END

**The horrible truth behind
whipped cream.**
