

# Peer Community In Animal Science

Free and transparent preprint and postprint  
recommendations in animal science

<https://animsci.peercommunityin.org/>

## WHY?

### Current publication system

- too expensive
- not transparent: reviews and editorial decision not available for readers

### Preprints

- free
- but not peer-reviewed

## WHAT?

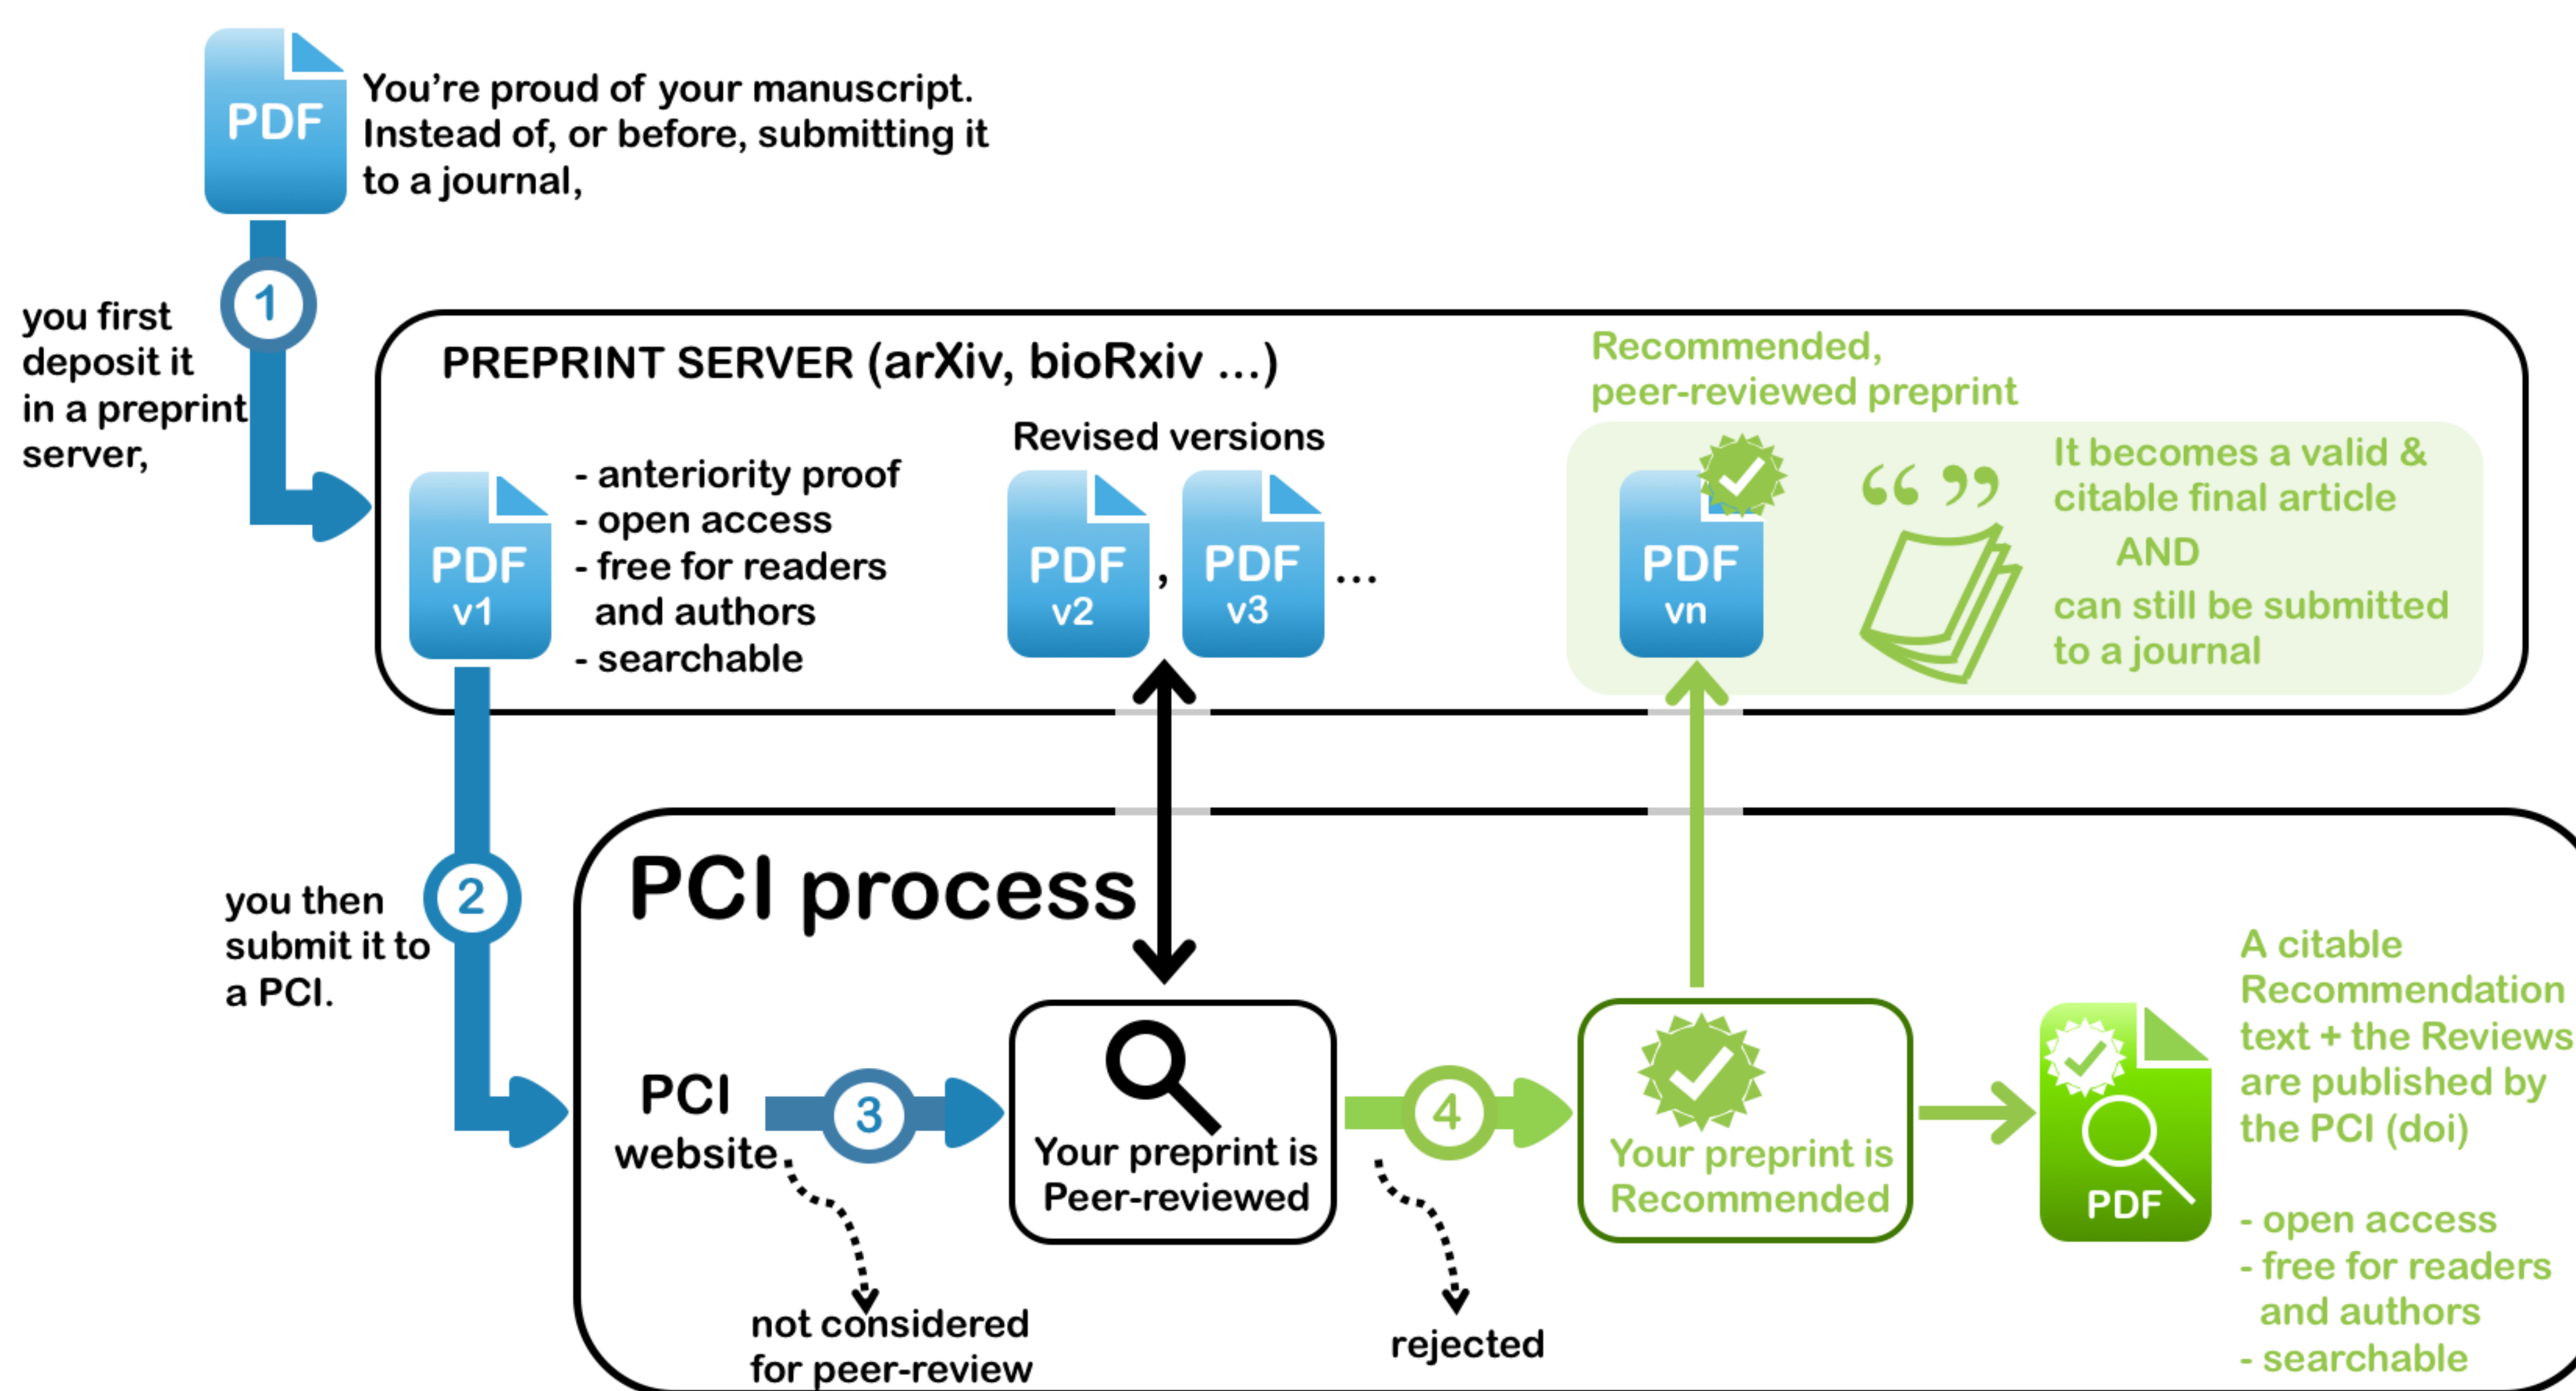

### Peer Community In (PCI) Anim Sci:

- international community of researchers peer reviewing and recommending preprints deposited in open archives, such as

- Managing board: 9 members
- Editors: 30+ and expanding
- Part of the Peer Community In project  
<https://peercommunityin.org/>

## THE PCI WORKFLOW

## ADVANTAGES

### Before submitting it to a journal

- You obtain  $\geq 2$  reviews of your preprint
- You improve the quality of your preprint
- A signed text recommending your preprint is published

### Instead of submitting it to a journal

- Your paper is **free** for readers and authors
- You keep the copyright
- Transparent editorial process of quality
- You support an open science and low cost publication system
